Originally published in 1911. PREFACE: THE article on Logic which Professor Adamson contributed to the ninth edition of the Encyclopaedia Britannica consists of a critical survey of the history of logical theory its value is well known to philosophical students and no apology is needed to justify its publication in separate form. It may be mentioned, however, that this publication was thought to be important at the present time, as the work was in danger of becoming less easily accessible owing to the issue of the eleventh edition of the Encyclopaedia, in which it is not reprinted. The manuscript of the article has been fortunately preserved alone among the manuscripts of the authors published writings. It is much fuller than the printed article, a number of passages some fifty in all having been struck out by the editor with a view to economy of space. These passages affect both text and notes they vary in length from a few words to whole sections they vary also in importance but the authors own opinion was that the value of his work had suffered by their omission and with this opinion I agree. In the present book these passages have been restored to their place, so that the article as it left the authors hands is now, for the first time, placed before the reader. The manuscript bears no trace of the editorial blue pencil, and the original proof no longer exists so that a doubt may arise as to whether any particular omission may not have been made by the author himself...
