

Case Studies in Bayesian Statistics

By Gatsonis, Constantine / Kass, Robert E.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Volume V | The 5th Workshop on Case Studies in Bayesian Statistics was held at the Carnegie Mellon University campus on September 24-25, 1999. As in the past, the workshop featured both invited and contributed case studies. The former were presented and discussed in detail while the latter were presented in poster format. This volume contains the three invited case studies with the accompanying discussion as well as ten contributed papers selected by a refereeing process. The majority of case studies in the volume come from biomedical research. However, the reader will also find studies in education and public policy, environmental pollution, agriculture, and robotics. INVITED PAPERS The three invited cases studies at the workshop discuss problems in educational policy, clinical trials design, and environmental epidemiology, respectively. 1. In School Choice in NY City: A Bayesian Analysis of an Imperfect Randomized Experiment J. Barnard, C. Frangakis, J. Hill, and D. Rubin report on the analysis of the data from a randomized study conducted to evaluate the New York School Choice Scholarship Program. The focus of the paper is on Bayesian methods for addressing the analytic challenges posed by extensive non-compliance among study...

Reviews

This book is great. I have gone through it and so I am confident that I will go through it once again in the future. I am just easily getting a satisfaction of looking at a written book.

-- **Miss Vernie Schimmel**

The book is easy to study and easier to comprehend. I have studied it and I am certain that I will go through it once again in the foreseeable future. Your lifestyle span will likely be transformed the instant you comprehensively read this pdf.
