COMPUTER NETWORKS: PRINCIPLES, TECHNOLOGIES AND PROTOCOLS FOR NETWORK DESIGN

Wiley India Pvt. Ltd, 2006. Softcover. Book Condition: New. A computer network is made up of a group of two or more connected machines. Many types of networks exist, but the most common types of networks are Local-Area Networks (LANs), and Wide-Area Networks (WANs). In a LAN, computers are connected together within a local area (for example, an office or home). In a WAN, computers are farther apart and are connected via telephone/communication lines, radio waves, or other means of...

Reviews

This pdf may be worth a read through, and much better than other. It is really basic but unexpected situations inside the 50 percent of your publication. I am delighted to let you know that this is basically the very best publication i have got read within my individual existence and can be he best pdf for ever.

-- **Linwood Reichel**

This publication is definitely worth buying. It typically is not going to price an excessive amount of. I found out this publication from my i and dad recommended this ebook to find out.
