

Methods of Studying Plant Water Relations

Filesize: 7.31 MB

Reviews

This pdf will not be simple to start on reading through but extremely enjoyable to see. I have read and i also am sure that i will planning to read through again once more in the foreseeable future. You wont really feel monotony at whenever you want of the time (that's what catalogues are for relating to if you request me).

(Mallory Kertzmann V)

METHODS OF STUDYING PLANT WATER RELATIONS

Book Condition: New. Publisher/Verlag: Springer, Berlin | To write a handbook of methods is surely to invite criticism, as has already been said several times. On the other hand, there is a great need for methodological manuals in all fields of science. It was therefore decided to compile this book, written in good faith to help scientists, teachers and students who will, it is hoped, use it and judge it good. To be useful to the reader, such a manual must provide a broad review of the methods available and describe them in sufficient detail to permit preliminary selection and judgement. It has to give - at least for selected methods - a sufficiently detailed description of the equipment and procedure as to be to some extent self-contained. It must assume a critical standpoint as regards the theoretical basis of the methods, the significance of results, and their errors and limitations. It must also furnish examples, pertinent numerical tables, and very complete references. All this and much more is expected of a good manual of methods. | 1 Water in Cells and Tissues.- 1.1 Introduction and Terminology.- 1.2 Units of Water Potential and Examples of Absolute Values of Water Potential and its Components.- 1.3 The Determination of Water Potential (ψ_w) of Cells and Tissues.- 1.3.1 Introduction.- 1.3.2 Compensation Methods in the Liquid Phase.- 1.3.2.1 Test Solutions.- 1.3.2.2 Cell and Segment Methods.- 1.3.2.3 Refractometric and Smear (Shardakov) Methods.- 1.3.2.4 Potometric (Volumetric) Method.- 1.3.3 Compensation Methods in the Gaseous Phase.- 1.3.3.1 Gravimetric Method.- Water Bath.- Measuring Vessels and Solutions.- Samples of Leaf Tissue, Weight Determination, Exposure and Evaluation of Results.- 1.3.3.2 Capillary Method.- 1.3.4 Psychrometric Methods.- 1.3.4.1 Principal Types of Psychrometers.- 1.3.4.2 Constant-temperature Water Bath.- 1.3.4.3 Construction of Psychrometers.- Type A (Peltier Psychrometer).- Type B (Droplet or Wet-loop Psychrometer).- Type C...
